

Aircraft compatibility

The safety of your animal is line number one. That's why we won't transport them on specific aircraft types and operators that don't fit our requirements.

Prohibited flights

Due to heating limitations, we cannot transport warm-blooded animals on any Airbus 319, 320, 321NX, 321S or 321H aircraft. Acceptable animals that can be transported on the Airbus 319, 320, 321NX, 321S or 321H include tropical fish, lobsters and other "aquatics." For further inquiries on specific animals, contact a specialist at the Expert Animal Help Desk at liveanimals.cargo@aa.com.

Airbus 319 · Airbus 320 · Airbus 321 · Airbus 321S · Airbus 321H · Airbus 321NX

Aircraft kennel compatibility

Mainline aircraft

- 400 series kennels or smaller are accepted on all mainline flights except on embargoed flights
- Kennel sizes up to 46 inches in height or smaller are accepted on 321T
- Kennel sizes up to 63 inches in height or smaller are accepted on widebody aircraft with the exception of A332 equipment

Regional aircraft

- 400 series kennels or smaller are accepted on all regional flights except on embargoed flights
- E175 aircraft can hold up to 5 kennels with dimensions *equal to or less than* 33x22x23 inches.
- E175 aircraft can hold up to 4 kennels with dimensions *greater than* 33x22x23 inches.
- All other regional aircraft can hold up to 2 kennels with dimensions *equal to or less than* 33x22x23 inches.
- All other regional aircraft can hold a maximum of 1 kennel with dimensions *greater than* 33x22x23 inches.

Aircraft Type	Max Kennel Size	Max Kennel Height
Boeing 787-900 (789) 787-800 (788) 777-300 (773) 777-200 (772)	All kennels up to max height	63 inches (160 cms)
737-MAX (7M8) 737-800 (737/738)	400 Kennel Series or smaller	28 inches (71 cms)
Airbus 321T (32B)	All kennels up to max height	46 inches (117 cms)
Regional ERJ-175 (E75) ERJ-145 (ER4) ERJ-140 (ERD) CRJ-900 (CR9) CRJ-700 (CR7)	400 Kennel Series or smaller	28 inches (71 cms)
