

Notable Changes for Live Animals

Live Animal Shipments

- American Airlines Cargo and US Airways Cargo are now fully integrated. Our cargo networks have been combined, systems aligned and cargo products harmonized.
- Live Animals can be accepted across the combined network (except on embargoed fleet types).
- New embargo for aircraft types (Airbus 319, 320, 321S or 321H).
Due to heating limitations, we cannot transport pets on any Airbus 319, 320, 321S or 321H aircraft. All other aircraft types are heat and vent capable. We are able to accept tropical fish, lobsters and other “aquatics” across our entire fleet.
- Prior to booking and/or drop off, please check schedules for embargoed fleet types.
- Priority Parcel ServiceSM (PPS) is our product name for all over-the-counter live animal shipments and is available for individual pieces up to 100 lbs. and under 90 linear inches.
- ExpediteFSSM is our product for all live animals shipments over 100 lbs.

001 Air Waybill Shipments

All freight shipments require 001 paperwork.

Business Extra

All eligible customers are able to join the Business Extra program, earning points to exchange for rewards.
