The right kennel for your pet

It is important you purchase the right size container for your dog or cat. Use the following indications to ensure your pet has enough space to turn about normally while standing, to stand and sit erect, and to lie in a natural position.

Measure your pet

A. From the tip of the nose to the root of the tail
B. From the elbow to the ground
C. The width of the dog at the widest point
D. From the floor to the tip of the ears or the top of the head, whichever is higher. Note that ears must not touch the top of the kennel when the animal is standing naturally.

How to calculate the kennel size you will need

Length = A + ½ B
Width = C x 2
Height = D

Above dimensions are internal measurements. Kennels that do not meet these criteria will not be accepted for carriage.
